District Overview

In the tribal map of our country, Odisha occupies an important place with the largest variety of Scheduled Tribe communities for which it is popularly known as the “home land of the Tribal.” As many as 62 different tribal communities reside in the state. These people live in contiguous areas traditionally forming their territorial units. In order to protect their interest and preserve their culture along with the development process, special provisions have been made under the ambit of 5th Schedule of the Constitution of India. The idea of ‘Scheduled Area’ was mooted under the provision to give special treatment to these tribal people and these areas are known as the Tribal Sub-plan Areas (TSP). In Odisha out of 30 districts, 12 districts which comprise a sizeable population of tribal inhabitants are covered under the TSP areas. The entire seven districts such as Kandhamal, Mayurbhanj, Sundergarh, Nowrangpur, Koraput, Malkanagiri, Rayagada and parts of five districts such as Balasore, Keonjhar, Sambalpur, Gajpati and Kalahandi are under its coverage. In a country like India, the seven major infrastructural factors that are most significant in accelerating the pace of economic development are energy, transport, irrigation, finance, communication, education and health. While the first five refer to economic infrastructural facilities, the latter two relate to social infrastructure. In this chapter an attempt has been made to provide a picture of development in these districts of the state which helps to calculate composite development index to measure development disparity among these districts of Odisha.

The chapter deals with district wise data on its administrative set-up, demography, educational institutions, literacy rate, vital statistics, GDDP, gender disparity in human development index and infrastructure development, health statistics and indicators, information on agriculture sector such as land utilization pattern, irrigation potential, forest land, operational land holding, crop production etc., information on socio-economic sectors such as ICDS projects, employment generation under MGNREGA, SGSY, beneficiaries under IAY and Mo Kudia, Pension schemes, village electrification status, railway routes and railway stations, communication etc. It is expected that the information as enshrined in this chapter will cater to need of all sections of researchers, planners and economists in the formulation of new plans and programmes for upliftment of these communities.

Table-9
Vital Statistics
(Health Indicators)

Indicators	Value
Crude Birth Rate (SRS-2009)	21 Per 1000 Population
Crude Death Rate (SRS-2008)	9.0 Per 1000 Population
Crude Death Rate (SRS-2004)	8.8 Per 1000 Population
Crude Birth Rate (SRS-2004)	22.7 Per1000 Population
Infant Mortality Rate (NFHS-3)	65 Per 1000 Live Birth
Infant Mortality Rate (SRS-2009)	65 Per 1000 Live Birth
Infant Mortality Rate (Urban)	40 Per 1000 Live Birth
Infant Mortality Rate (Urban) (SRS-2009)	46 Per 1000 Live Birth
Infant Mortality Rate (Rural)	69 Per 1000 Live Birth
Infant Mortality Rate (Rural) (SRS-2009)	68 Per 1000 Live Birth
Natural Growth Rate (SRS-2004)	13.10%
Natural Growth Rate (SRS-2005)	12.80%
Natural Growth Rate (SRS-2006)	12.60%
Natural Growth Rate (SRS-2007)	12.40%
Natural Growth Rate (SRS-2008)	12.30%
Natural Growth Rate (SRS-2009)	12.20%
Total Fertility Rate (SRS-2008)	2.4
Couple Protection Rate (NFHS-3)	50.70%
Life Expectancy at Birth (1996-2001)	61.64 years
Maternal Mortality Rate (SRS 2007-09)	258 per 1,00,000 live births
Perinatal Mortality Rate (1997-SRS)	65.3 per 1000 live & still births

TSP Blocks of Odisha

The state has unique distinction of having 62 different tribal communities spread over 30 districts and 314 blocks. As per 2011 census, they constitute 22.85% of the total population of the state and 9.20% of the total tribal population of the country. Among the 314 blocks of the state 118 blocks are under scheduled areas which have been covered under the TSP approach. These blocks are called Tribal Sub plan Blocks. The TSP approach envisages integrated development of these scheduled tribal areas. Presently 21 Integrated Tribal development Agencies (ITDAs) are functioning in 12 districts of the state covering these 118 blocks having more than 50% of tribal population. In order to protect the interest of the tribal population and bring sustainable development to these areas various developmental initiatives have been taken up. It is needless to say that such planning of the region more or less depends on various informations relating to socio economic development. Keeping this in mind this chapter highlights various socio-economic indicators and infrastructural facilities available in these blocks. To begin with, the chapter deals with the geographical location, administrative set-up etc. of each block. It is followed by data on ten sectors such as demography, education, housing, health, agriculture, irrigation, drinking water facility, infrastructure, veterinary institutions and social security programmes. The data furnished here are as per the latest data available with us. A short description on some of these sectors are given under.

Demography is important as it presents population data in a systematic manner. It also aids in framing of economic programmes that contribute to economic development keeping in pace with the rate of growth of population. Demography sector includes data on population, child population, sex ratio, child sex ratio, workers and Work Participation Rate (WPR).

Education plays a vital role in the process of development of human resource. In this context literacy is an important indicator of development of education. The number of educational institutions is also important in attaining literacy level. Under the education sector number of literates, literacy rate, no of graduates, gender disparity index in literacy, enrollment, have been covered. In housing sector which indicates the status of shelter provided to the population is also depicted by giving the total number of households and household size with the number of beneficiaries under IAY, Mo kudia etc.

Orissa's economy is predominantly characterized by traditional agriculture. It is always affected by vagaries of nature as it predominantly depends on monsoon.

The state is frequently affected by drought in the highland districts and floods in the coastal districts due to erratic behavior of the monsoon. In such a scenario development of irrigation facilities to mitigate the twin problems of drought and flood cannot be underestimated. From the data given under agriculture and irrigation sector one can estimate the actual percentage of gross irrigated area to gross cultivated area of a block and also get a glimpse about various sources of irrigation.

Economic development is virtually depends on the development of the energy sector. In order to introduce modern agricultural economy by the application of scientific inputs and technology the country has been striving for generation of more electricity, and 100 per cent electrification of the villages. This is evident from the progressive increase in per capita consumption of electricity in these areas. The actual state of electrification of the villages in different TSP blocks of Odisha is shown inside.

Health constitutes a part of the social infrastructure and combindly they reflect the development scope of human capital. Under the health sectors data on number of Medical Colleges & Hospitals, Dispensaries, Health centers, Sub-centers, Maternity Centre, Child Welfare Centre, Doctors and Community health worker are provided along with information on AYUSH and Homeopathy.

The status of banking and financial facilities extended to these areas, creation of stadiums, sports club, community halls are also given in the chapter.

Animal husbandry is also an important source of income of the rural economy. No of veterinary institutions, health personnel present in blocks are given to reflect the status of improvement in these areas.

Social Security protects not just the beneficiary but also his/her entire family by giving benefit packages in financial security and health care sector. Social Security Schemes are designed to guarantee at least long-term sustenance to families when the earning member retires, dies or suffers a disability. Thus the main strength of the Social Security system is that it acts, as a facilitator - it helps people to plan their own future through insurance and assistance. In social security sector beneficiaries covered under BPL, Pension schemes, SGSY, MGNREGA are given, which shows the involvement of the state in different welfare activities. In a nutshell, this chapter aims to cater to the need of all planners, researchers and academicians in the field of their activities.

Bamra, Sambalpur

Bamra C.D. Block is a part of Bamra Tehsil under Kuchinda Sub-division, located in the north-eastern part of Sambalpur District at a distance of 120Km from District H.Q. It is surrounded from three sides i.e from north-west, north and east by Sundergarh District, Kuchinda C.D Block from south and Jharsuguda C.D Block from west. It is located in the North-Western plateau of Odisha. Total geographical area of the the Block is 510.93 Sq. km out of which 179.56 Sq. km. is forest area. The important rivers flowing through this Block are Bheden, Loranga and Purota. As per Census 2001, out of total population of 88459 persons, 10.54% belong to Scheduled Caste and 63.13% belong to Scheduled Tribe community. The Sex ratio of the total population of the block is 1013 and that of SC population is 1009 and ST population is 1024. Out of the total population 50.29% are workers and among the total worker 10.68 % are SCs and 64.76% STs. The overall literacy rate is 56.97 for total population, 49.00 for SC and 50.80 for ST. Out of the total area, 39.95 percent is cultivable and 2.64 percent of cultivable area is irrigated. The average land holding size is 1.06 Hect. in this Block. Out of total 136 villages, 126 (93%) are electrified.

• Community health worker	00	• Post office	14
• No. of Doctors	05	• Sports club	00
• AYUSH infrastructures (Homeopathic Dispensaries)	00	• Stadium	00
• AYUSH infrastructures (Ayurvedic Dispensaries)	01	• No. of Banks	03
Agriculture		• No of Credit Society	01
Land Pattern	Area (In Acers)	• No. of AWCs	196
• Forest	30603	Veterinary Institutions	
• Land put to Non-Agri. Use	3235	• No. of Vet. Hospitals and Dispensaries	01
• Barren & Non Cultivable land	14318	• No. of V.A.S and Additional V.A.S	02
• Permanent Pastures and other grazing land	2317	Social Security Programmes	
• Net area sown (Land under misc. tree crop and groves not included)	06	• No. of BPL families	15478
• Cultivable Waste land	617	Pension schemes	
• Old Fallows	3754	• MBPY	4712
• Current Fallows	1829	• IGNOAP	4807
• Net area sown	24342	• IGNDP	00
Average Size of Land Holding per household (in Hect.)	0.51	• IGNWP	00
• Total area	44018	• NFBS	57
• Cultivable area	10467.48	• BSY	00
• Irrigated area	125.61	SGSY	
Irrigation		• No. of Beneficiaries Covered	511
Type of Irrigation	Area (in Hect.)	MGNREGA	
• Govt.canal	57.63	• No. of Job Cards Issued	23672
• Pvt.canal	0.00	• No. of Beneficiaries provided Employment	7487
		• No. of Households provided Employment	7487
		• No. of Mandays generated	371000

Formula used

- **Child Sex Ratio** : Child sex ratio (0-6 years) has been defined as the number of females in age-group 0-6 years per 1000 males in the same age-group in the population. It is expressed as 'number of female children age (0-6) years per 1000 male children age (0-6) years'

$$\text{Child Sex Ratio} = \frac{\text{Number of females children}}{\text{Number of male children}} \times 1000$$

- **Gender Gap in Sex Ratio** = 1000 - Sex Ratio
- **Gender Gap in Child (0-6 Yrs) Sex Ratio** = 1000 - Sex Ratio (0-6 Yrs)
- **Gender Gap in Literacy** = Male Literacy Rate - Female Literacy Rate
(Gender Gap in Literacy is the difference between male and female literacy rate)
- **Gender Disparity Index in Literacy** = $\text{Log } x_2/x_1 + \text{Log}(100-x_1)/100-x_2$
Where $x_2 \geq x_1$
 X_1 = Female Literacy
 X_1 = Male Literacy Rate
(Disparity in literacy level relates to their respective spheres of dominance)

- **Gender Parity index in enrolment** = $\frac{\text{No. of Girls Enrolled}}{\text{No. of Boys Enrolled}}$
(Gender Parity index in enrolment is the ratio of the number of female students enrolled at primary, secondary and tertiary levels of education to the number of male students in each level)

- **Literacy Rate** : Literacy rate of population is defined as the percentage of literates to the total population age 7 years and above.

$$\text{Literacy} = \frac{\text{Number of Literates}}{\text{Population aged 7+ years}} \times 100$$

- **Population Density** = $\frac{\text{Total Population}}{\text{Total Area}}$
(Population Density is the population per unit of land area; for example, people per square mile or people per square kilometer of arable land)
- **Sex Ratio** : Sex ratio has been defined as the number of females per 1000 males in the population. It is expressed as 'number of females per 1000 males'.

$$\text{Sex Ratio} = \frac{\text{Number of females}}{\text{Number of males}} \times 1000$$

- **Work Participation Rate** = $\frac{\text{Total no of worker}}{\text{Total Population}} \times 100$
(Work Participation Rate (WPR) is the percentage of total workers to the total population)
