= Shri. Kekela aged about 60 plus a ~~to~~ known case of chronic bronch it is leading to COPD, gets acute episodes of bronchospasm. He is being treated in his house by medical staff. Completion of a course of treatment is not possible because of his non availability after initiation of treatment. To get him back to his residence is a very difficult job for both his relatives and others. Facing problem to treat him if such an attack occurs in the jungle. This is your information pse. Some ongoes have been sent to PHC H/way for investigations on 25/8/98 =
