

(119) (124) (121) (129)

A copy of survey report- 1997 of the medical team, hemoglobin report of the Andamanese tribe submitted by the medical team visited Strait Island on 6.7.1998 and the important correspondence requesting Director (TW) for evacuation of the patient to Port Blair are attached herewith for kind perusal.

Further, on scrutiny it is revealed that during 1996 one neo-natal death occurred soon after birth out of a twin delivery (cause of death : pre-maturity). During 1997 there was no death and during 1998 one death of a lady aged 66 years occurred due to cardiomyopathy as diagnosed by the treating Medical Specialist at Port Blair and this is not related to malnutrition.
