The observations of Secretary (TW) at para 102 at page 27/N may kindly be seen.

- I) The proposal for supply of jaggery, ground nuts, moong dals, eggs to Onges was submitted in another file as recommended by the Medical Officer-in-charge, Dugong Creek and it was recommended by the Director (TW). But the Secretary (TW) opined that we should have the recommendations of DSS and RMRC with regard to supply of nutritious food items and he desired that we should wait for the recommendation as we have to take all precautions before giving items to primitive tribes and without expert opinion we should not take any action. The copy of the notes placed at page 97-98/C.
- II) As desired signal has been send to Medical Officer-in-charge, Dugong Creek, Long Island, Rangat, Hut Bay, R. K. Pur, Shompen Hut Complex and staff of AAJVS. Copy of signal placed at page 99/C for kind perusal.
