Sub: *A Lecture on Origin and Migration of Andaman Tribes and on other riddles-reg.*

Sir,

I am to draw the kind attention of you on the following that

I am a young local researcher having M.Phil and Ph.D degree on the local primitive tribes besides published several research papers in reputed journals on tribal issues. Presently I am working as Consultant in AAJVS.

As I have observed that most of the members in AAJVS and Directorate of Tribal Welfare (including field functionaries) are not aware of many important facets of the rare human species of the Isles who are atleast 50,000 to 1,00,000 years old. Their many mysteries are still untold. The facts about their previous migration and origin are still obscure and serves a challenge for an intensive study to carry out on them.

But perhaps for the first time a horripilating lecture focussing origin and migration and many interesting issues like story of Dudhtath Tiwari. Love affairs between Jarawa and Great Andamanese, colonization, murders and battles etc. will be delivered by me in presence of the higher officials and staffs who are working for the tribal betterment.

Further I seek your kind co-operation in making arrangements for the above said purpose.

Thanking you,

(Dr. Pronob Sircar)
Consultant
AAJVS.

Pl put up to regular 12.8
cos his return from date
