

Similarly, it also decided to prepare one more Project titled-
"Health Care for Jarawas and other Primitive Tribes of A & N
Islands". The objective of the project is to provide effective health
care to Jarawas and other primitive tribes of A&N Islands. Like
most of the communities, the Primitive Tribes do have their own
health care system, which may turn out to be not so effective with
a sudden change in the ecological conditions, like the ones that
would befall on them following their indiscriminate and rapid the
contact with other human groups. Once isolated Communities
would be susceptible for introduction of new diseases when they
come in contact with other human groups and further their ethno-
medicine would not be able to tackle such foreign ailments.

(4)

This is possible only when we have access to their habitat
with well equipped Hospital ship with all medical facilities
comprising Doctors with necessary staff, operation theatre,
laboratory facilities and medicines apart from the availability
expertise of Social Scientists like Anthropologist. It is, therefore,
proposed to procure one vessel with all the facilities.

(5)

In pursuance decision taken two draft Projects is placed in
the file for kind perusal please.

(6)

The note of Secretary (TW) mark to C.S is also added in the
file please. at page 11c.
