

By a Jarwa man, I have shown one small 4A moving near to my feet and questioned whether you eat this? Yes he replied, ^{The Jarwa} he took it by his hand, and broken the shell of the small and started explaining me what are the ~~p~~ edible parts in the small and how to clean it. He has also mentioned different names of fruits, tubers, birds, fishes they eat, but in a short stay of us it became very difficult to understand the whole concept of food.

The concept of cooking food exists among them in the settlements I find the cooking hearth where they generally cook the food by way of roasting. It is also observed that the unripe bananas they roasted on the fire and then they consumed. The technique of cooking, baking and roasting needs to be studied in detail.

V. DRESS AND ORNAMENTS

The Jarwa's are not having the concept of clothing or covering their body parts in any kind of material. All the 24 Jarwa's both male and female are found nude.
