Respected Sir:

This is to acknowledge the letter from your office about the forthcoming schedule of the work-shop.

Please note that I will reach Port Blair from Calcutta on 12th (late morning) by JetKonnnect flight.

I will bring along with me the documents (two sets) that need to be copied for all the participants of the work-shop. It would be best taken up in the noon after I check into my room so that things are in place.

I hope that the venue of the workshop has facility of a lap top and a projector for showing power point presentation.

I would request you to, keep the Anthropological Survey office to do their presentation in the start and leave me for being second in sequence.

I hope the administration is taking steps to provide the project team with three small digital cameras, and if possible a GPS instrument and if possible a small basic computer that would be used for the coming year to process and file the constant flow of data. I will be happy to discuss the rationale and justification of this during my visit.

Sincerely

Prof. Vishvajit Pandya.
