

### SUGESTED IMMEDIATE STEPS TO BE TAKEN.

1. Install Dipu to be overall responsible person for Tirrur region. He has very good track record of work among the Jarawas and has been groomed in all aspect of Jarawa field situations by long standing involvement from Kadamtalla. He is extremely competent in field language and is well respected and endured by all the Jarawas of three different areas. He in fact made the most significant contributing along with his mentor Anoop in various research projects. Dipu should be given full responsibility (officially accompanied by order made known to concerned field staff in Jarawa area and it must be accompanied by some sort of change in his monthly salary).
2. Dipu would be expected to take up residence in Tirrur right next to the AAJVS office in Tirrur (the office has a room attached for his occupancy) His regular presence would be a major impact on the two communities undesirable relations of exchange. He must monitor and identify individuals both tribal and non-tribal who need to be taken care of culturally and legally. As he is not from the area he would be relatively more objective and less susceptible to local political influences and pressures.
3. Dipu himself is a well trained boats man so complimented with an access to motor vehicle and boat would be more mobile and less dependent on rented or available "dongee walah" who change from time to time and these dongees (some times contracted by AAJVS) are the primary culprits or connected with villagers involved in dubious relationships with Jarawas.
4. A list of duty for all the field staff in Tirrur must be fixed and strictly enforced by a random rotation under Dipu's directive and must be strictly followed.
5. It must be made clear to Dipu that in duration of three months he must bring to book list of villagers who could be under surveillance via police or brought to books. He must report directly to the Secretary TW and keep in touch with Hon. Director of ANTRI.
6. ANTRI expert group will extend full cooperation and assistance any time required by the Tirrur group.
7. At the end of the nallah leading to Jhaukona and Bada Balu side (Site of old police chowkee) a new small check post must be set up to monitor the dongee movement (whose dongee time and destination and content must be recorded). The exact location of this chowkee must be decided in consultation with Anoop Mondal and Dipu. The policemen who are posted in the vicinity along with the Tirrur field staff can man this new small chowkee. This vicinity has a basic Hot Spot structure (may not be complete) but could be made active at least
