

From pre-page.

I have discussed the case of Kuaku Onge boy with Director of Health Services today. He told me that he will get the boy examined by ENT specialist in the first instance. Director (TW) should, therefore, get in touch with the DHS this week and then put up.

AHS

1. It is requested that the boy be brought to Port Blair and examined by our ENT specialist, we will also do an audiogram. Based on these findings we should send the case for further management/ training. (94)

2. Health of tribal, which is one aspect of welfare can be better tackled with dialogues/meetings rather than on paper. In my stay of one year at DHS this problem was not projected to me. (95)
