Officer-in-Charge Genetics Unit,  
Department of Pediatrics,  
Old Operation Theatre Building,  
All India Institute of Medical Sciences,  
New Delhi - 110029.

Sub:- Treatment of two Andamanese childrens.

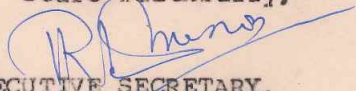

Sir,

I am to state that during your visit to this territory in February/March, 1988 heading a Medical team for conducting <sup>an</sup> in-depth study on the health of the Primitive tribes, we had some discussions on various tribal problems, one amongst them being the state of health of two Andamanese girls, daughters of Shri Pijhe, who were suffering from Aneamea. They required blood tranfusion of and on. You ~~very~~ kindly agreed to examine these two children during your visit to Strait Island and give your valuable advise. Although I could not meet you on your return from Strait Island, I was given to understand by Dr. Ilango and Dr.(Mrs) Susan Mathew that they had some caffiac problems and you would be discussing this matter with Director of Health Services and sending your report.

I am, therefore, to request you to kindly advise us as to the further action to be taken for the treatment of these two childrens.

Thanking you,

Yours faithfully,

  
EXECUTIVE SECRETARY,  
AAJVS.
