

- (viii) It would be desirable to try homeopathy medicines among the Jarawas. For this, Government homeopaths could visit Jarawas for the purpose of diagnosis and study and to prepare the reports on the administration of the homeopathic treatment among the Jarawas.
- (ix) To facilitate the preparation report by the Expert Committee, it is essential to have feed back from the concerned Department like Police, Forest, Health and Andaman Adim Janjati Vikas Samiti etc. on the problems faced by them and experiences in dealing with the Jarawas ever since the change in the Jarawa's behaviour.
- (x) The study team should not be very large at any point in time at Jarawas camp. This will not only hinder the study of various aspects of the Jarawas by respective team members but also may not be acceptable to the Jarawas themselves. As such, the study teams could be categorized into two groups - (a) the teams that would *inter-alia* study culture, behaviour, Health & Nutrition and (b) natural resources available for Jarawas. Both these categories of the team should have anthropologist as members. These groups can chalk out their movement in the Jarawa area separately and should cover all the bands as far as possible.
- (xi) The Administration may provide all required logistics and other assistance for the Composite Group while they are carrying out study among the Jarawas. The equipment like GPS (Global Positioning System) etc could be provided to the Composite Groups.
