(61)

Electricity Department may be asked to install the solar pannel and connect the complex out of their TSP budgetary provision and the monthly energy charges can be paid out of Special Central Assistance granted to the Samiti.

(62)

Subject to approval we will take up the matter with S.E Electricity department.

As the Shompen Hut Complex is in deep Jungle, ~~sufficient~~ sufficient Sun light may not be available for Solar plants.

More over as far as dugang creek + St. Island are concerned, these are settlements where all the tribals are parked which is not the case in Shompen Hut Complex. The cost of Solar power project is also very high. So some other ~~more~~ Economical viable alternative could be considered like small generator which can supply sufficient current/energy as per requirements.
