G. STRAIT ISLAND:

We briefly visited the Strait Island. While a few points which need to be acted upon have been taken note of by Shri CR Garg, Director, IP&T, I would like to mention the main demand put forward by the headman. This is regarding supply of electricity during the night by providing an additional D-gen set as the existing set is old and develops faults at time and therefore has to be shut down quite often. This needs to be looked after on priority.
