(MANOHAR SINGH)
Superintending Engineer(Elect)

Dear Shri

The existing semi-permanent building where the Power House at Strait Island was operating, was completely damaged as one near by tree got up-rooted and fell on the building. The DG Set has been removed and temporarily installed in an old small room on Katcha floor to resume power supply to the Tribals of Strait Island. It will not be possible to run the Power House with this temporary arrangement for long time due to poor air circulation and leakages during rainy season, which could be dangerous for the DG Set and the operator.

An administrative approval & expenditure sanction for constructing a new power house building of size 9 x 5 mts. has already been accorded and the work allotted to Executive Engineer, CDI, Port Blair vide No.WS/1-5(B)/CE/98/7323 dated 25/01/99. The building is to be constructed as per drawing No.SA/AN-020/21/4124.

It is to request that necessary action may be taken to construct the power house building on priority so that the DG Sets can be installed in the new building before monsoon and power supply provided to the Tribals without any interruption.

With

Yours

(Manohar Singh)

Shri R.K. Singh,
Superintending Engineer, PBCC,
APWD, Port Blair.
