Sub :- Construction of Power House Building at Strait Island -reg.

Sir,

The existing semi permanent Power House Building at Strait Island, constructed by this department, where the Power House was operating, was completely damaged during February '99 as one nearby tree got uprooted and fell on the building. The DG Set has been shifted and temporarily installed in a nearby room on katcha floor to resume power supply to the tribals of Strait Island. It will not be possible to run the Power House with this temporary arrangement for long time as the rain water is leaking in the room where the DG Set is temporarily installed. This could be dangerous for the DG Set and the operator.

The Administrative Approval & Expenditure Sanction for constructing a new Power House Building has already been accorded and the work allotted to the Executive Engineer, CDI, Port Blair vide No. WS/1-5(B)/CE/98/7323 dt. 25.01.1999. The matter has already been taken up with the Executive Engineer, CDI, APWD vide letter No.EL/PL/31-1/99/2434-38 dt. 26.02.1999 and with the Superintending Engineer, PBCC, APWD vide D.O. letter No. EL/PL/1-3(a)/99/2904 dt. 10.03.1999 to take up the construction of Power House building.
