Sir,

This is with reference to your letter No.MA/G/16-1/809 dated 4th November 2008 about conducting the survey with Theodolite Machine; we have already completed the Theodolite survey during the year 2001-2002. In this regard, this office already informed in writing that the Jarawa reserve is carved out of Forest area and the notification issued delimiting the area by Geo-referencing indicating the latitude and longitude. So this survey will conduct by GPS instruments only.

And the Revenue Surveyors have already been directed to provide assistance wherever required, particularly where the reserve area passes from the Revenue village boundaries.

Yours faithfully,
