

Discussed with Director (TW), A&N Administration.

The 3<sup>rd</sup> phase of Jarawa study is scheduled to commence from 10<sup>th</sup> August 2002. The study is to continue in this ongoing monsoon period whereby it would be difficult to get fresh potable water at the three camps i.e. Tirur, Middle Strait and Kadamtala as the streams are overflowing with mud contents that is un-hygienic for human consumption.

Therefore we may provide the team members with mineral water. As per the discussion held on 17.7.2002 at Circuit house, marine hill, it was estimated roughly that a member would consume 3 litres of water a day making it 93 litres for 31 days. For 70 members it would require 6510 litres of mineral water costing approximately Rs.65,100/- (Rs.10/- per litre)

The Secretary (TW), A&N Administration, is the competent authority to approve the above proposal.

Submitted for approval please.

Executive Secretary  
AAJVS
