

- x. The Administration may provide all required logistics and other assistance for the Composite Group while they are carrying out study among the Jarawas. The equipment like GPS (Global Positioning System) etc could be provided to the Composite Groups.
- xi. A crash course on the Jarawa language would be organized for the benefit of Composite group members by inviting at least two linguists from Anthropological Survey of India ~~and also if possible from Central Institute of Indian Language, Mysore, before the Composite Groups move to the field for survey.~~
- xii. The questionnaires are to be pre-tested and members of the Composite Team are to be trained by the concerned experts before they proceed to the field.
- xiii. It would be desirable to document the behaviour of the Jarawas on day to day basis by the field officials belonging to various departments. A properly bound Register could be provided to the Social Worker (AAJVS), Pharmacists, Medical Officers, Police Officers and others who would record their observations on the behaviour of the Jarawas daily. This will build up the information bank on the Jarawas and their behaviour which will be of immense help for subsequent studies.
- xiv. There are Medical ^aAnthropological researches~~s~~ carried out in other parts of the world involving hunting and gathering communities. It would be desirable to learn from the experience of administration of modern medicines to such foragers elsewhere in the world. Director of Anthropological Survey of India, Calcutta could write to such Medical Anthropologists to get the information / published reports for the use of the Expert Committee.
- xv. ~~As decided during the first meeting of the Expert Committee, it is rather urgent to take up with the Government of India on the issues relating to protection of the genome (genetic material) of Jarawas.~~ ^{The}
