

South Andaman. The research teams will land on the coast by using life boats of the vessel as it was being done earlier by the contact expedition team using M.V. Tarmugli.

The research team after conducting the study of Jarawas in the forest in the day time would return to M.V. Shompen in anchor for the night stay over board. Next day the team will again proceed to Jarawa areas. This system would continue for about 10 days or so.

Therefore I am directed to request you to make M.V. Shompen or any other suitable vessel in its place for the purpose of the study of the Jarawas in pursuance of the Order of the Hon'ble High Court, Calcutta.

Yours faithfully,

(Shanti Benari)
Executive Secretary,
AAJVS
(CF No.:T2-2051)
