

were 32 jarawa in all their sex use breakup etc was as follows

① Male - 17
 $\swarrow$ 10 adults
 $\searrow$ 7 children

② Females - 15
 $\swarrow$ 12 adults
 $\searrow$ 2 children
 $\searrow$ 1 infant (about $1\frac{1}{2}$ months)

after taking rest for same time jarawa started playing with us, mean time we also counted their bows and arrows which were kept aside, there were as follows

① 42 nos. hunt arrows with flat iron ends.

② 6 nos. fishing arrows with pointed ends which was of iron.

③ 2 arraca arrows with pointed ends without iron

④ 10 nos. bows.

After that 3-4 jarawa males took us to their abandoned huts to show us their water source, there were 4 huts at one place and 3 huts nearby and 2 dry wells with not a drop of water, along with jarawa men we walked inside forest along one dried water stream after walking about $1\frac{1}{2}$ Km. jarawa showed us one place
