17) PVC at page 14/c N.

This is a signal from the J. Gr. E. E. E. M. and Howlock stating that she had deputed staff for collection of dismantled items from S/Island, but the 1/2 PMS ignored to hand over the items twice. She has requested to take necessary action.

18) It is to add here that the E. E. M. division has been assigned to under IEI works at S/Island. They have completed the work and have to take back dismantled items as dead stock for record keeping. As per normal routine practice, old items are to be accounted for so that only new replacements are fitted.
