

Proposed Activities:

Comprehensive Primary Health care and referrals

1. Training two ASHAs selected among tribal girls.
2. A Staff Nurse (Nurse practitioner) will be posted to the clinic
3. Nurse will be trained for taking care of mothers & child health care needs. She will provide preventive, promotive and curative health services. She will be trained as Nurse practitioner
4. An MBBS/Ayush doctor would visit once a week.
5. Nurse would have phone connection for getting guidance from the medical officer.
6. All members of each household will be screened and individual case records will be maintained.
7. Traditional health practices would be studied and included in Primary Health Care. One of the ASHA will be trained in the traditional practices.
8. An Essential drug list and Standard treatment guidelines will be prepared and train the health workers and Medical officers to use them.
9. System would be developed for referring patients to Port Blair Hospital. Guidelines would be prepared for the management of referred cases.
10. Andaman Aadim Jati Vikas Samiti (AAJVS) will manage the health centre and Karuna Trust will work to improve the health system.
11. ANM & Staff Nurse to be provided by AAJVS or Health department
12. Training:
 - Orientation training for medical officer visiting the island.
 - Induction training for Staff Nurse or ANM.
 - One month training for ASHAs
