Sub: - Welfare report of Jarawa child - reg

Sir,

Furnishing herewith reports on a Jarawa Boy named Abina S/o Titaba as asked for by you:

He was admitted in G B Pant Hospital on 03.06.2010 as a referred patient from PHC Kadamtala with history of trauma to head at Baratang at about 5-30 pm the previous evening. At PHC Kadamtala the baby was drowsy and vomited once. He received supportive treatment there and was referred to G B Pant Hospital for investigation and treatment.

On admission the condition of the baby was reasonably stable with a scalp injury (abrasion) over right parietal region. C T scan was done the following day which showed scalp hematoma at right temporo-parietal region with linear fracture on right parietal bone. During hospitalization he had a bout of bronchospasm for which nebulisation was done with bronchodilator.

Patient responded well to conservative treatment and discharged on 09.06.2010 after consultation with pediatric surgeon.

Yours truly

Dr M K Saha
Medical Superintendent
