- These bills have been duly verified by the committee member in all respect and there signature is already obtained accordingly.
- The question on the discrepancies of the drawing the monthly ration quotas appear to Tsunami is that ; is depend on the arrival of each group the Shompens who came from different parts of Great Nicobar Island. Further to intimate that occasionally these groups visited the Headquarter depend on weather condition .And few of them bring their families and children.
- Ascertaining the quota was never in case of adults & children's as monthly basis needs to be ascertained and fixed .
- To ascertain such unexpected arrival of the Shompen, a formal format may please be sent from the office with all instruction /guidance, indicating the age and the quota issued to each Shompen of their area.

And the bill above has been verified that were issued to them. Necessary thumbs impression may be seen overleaf of the stock issued.

This is for your kind information please.

Thanking You,

Yours Faithfully
