

The issue was discussed at the Interactive Sessions held on 1st and 2nd August, 2001 at Megapode Nest, Port Blair between the Tribal Leaders, Members of Zilla Parishad and Officers of the Administration on formulation of 10th Five Year Tribal Sub-Plan (2002-07), in which it was suggested that either the fund provided towards streetlights may be placed at the disposal of the Tribal Councils or the Tribal Welfare Department may evolved a system to make regular payment of the electric charges to the Electricity Department.

As the Tribal Councils of the Nicobarese have no legal status, the fund provided towards streetlights cannot be transferred to them. Therefore the Tribal Welfare Department will directly make payment of the electric charges towards streetlights. However, the Electricity Department will be requested to prefer the bills through the respective ACs so that the bills can be verified and sent to the Tribal Welfare Department for payment. If approved we may inform the SE, Electricity and others concerned in the above lines.
