

(92)

(24)

is required to be re-started.

- (4) There are some elderly Nicobarese living in the above settlement whose cases under old age pension scheme has not been considered. This requires specific attention of the Administration.
- (5) From the settlement area upto the culvert, falling in the light house road, there is no metalled road (Distance of about 2 kms).
- (6) In the adjoining hospital of the settlement area, there is no water tap connection. This requires immediate consideration.
- (7) There is a Nicobarese guest house near Hut Bay Break Water which is without water supply, toilet and kitchen facilities etc. There is a main water supply line outside the guest house on road. Therefore, water connection in the Nicobarese guest house can be provided easily.
- (8) In the entire compound of guest house there is only one Katcha well which is insufficient to cater water requirements of the guest house inmates. The well requires to be fitted with cement rings inside the well to make the water pollution free.

It is, therefore, requested immediate instructions in the matter may be issued to the concerned departments.

Thanking You,

Yours faithfully,

(H.S.PANT)
Acting State President.
