This is an aspect, Andaman and Nicobar Administration depends on some bureaucrats and anthropologist report, where it say, 'this primitive tribes shall not be allowed to mingle civilise people, their food especially cooked one, are not only harmful but dangerous for them, thus now a days these jarwas are speckle in our country on its map and geography. This is major determination of the local administration. This is diemay to narrate, now a days, these jarwas with their children are kept under thick cord & security. It is, by and large, an open secret that the report of expert are mere plunder to llot primitive tribes funds getting from G.O.I to the extent Rs. 50 to 75 lacs per years and other several lacs of rupees for arrangement to change their life style and purchase of machineries and other amenities, needs for their development. The M.V Milalee (now lying as dead body but staff salary is continued from jarwas funds) is right now a reference in this chord to verify and trace out our report veracity. These are clout to safe "pure" the local administration A.J.J.S (Adem Jan Jeti Vikash Samithi).

As we have earlier mentioned free of cost supply banana and coconut to jarwas, it is also our report that these two specific food items are found in and around Andaman Trunk Road from Middle Strait to Kadamtala passage, as a guest has thrown rice ball on the face of an host in his own kingdom'.

This is not our aim, to take this primitive tribals towards debility, we justify, if Anthropological Survey of India report is true, by virtue of their research, by this time more than 75 to 80 % jarwas could have died eating cooked food like rice, biryani, chitni, fry fish, idly, dosai and biryani. These items they are taking since last 10 years in open.
