Our report reveals:truely they are habitual to take these food in past also,while hunters,poachers and intruders were on cross road for their safety and collection of resins hawabill from their places in dense forest from Chainpur to Kadantala to Ferragunj area including Wandoor etc etc.

This is a shameful event for we Indian,when foreign, Indian mainlanders and local tourists use language, 'we have come here to have a glance on naked and hungry jarwas and to throw all these bundle of food towards them' 'as they are worst and ugly Indian beggers found on the Indian mainland and foreign city and elsewhere in the world.

Such disparity is nothing but to destroy their dynasty. Till date there seems no comprehensive programme either by local administration or by any NGO in this island for their proper settlement in some selected area,out of such dense forest,where though they live in cluster but dead fear of killing by poachers and intruders,hunters.

It is high time and the best opportunity for us to allow them mingling with us in open.This will be fine and fit for them to be acquainted to join us in a stream of progress like Onges and Nicobarries,for a decent way of life,instead of having fractured one in scorching and biting sun and dirty attack of hunters,poachers and intruders.

We therefore,intend to get your intervention in the matter and request to depute your representatives to check the situation for rescue country oldest dynasty.Your action & report may find a place in G.O.I ministry and in our own administration for suitable remedial steps.This is only the best way to safeguard the primitive tribes from ruin and destruction.
