HCL LABS

■ The marketplace is constantly changing in terms of consumers, competition and strategies to garner market share. Almost all aspects of your business are ever-evolving. The only change over the past few years is that the pace of change has accelerated! In fact, it is increasing even as you read this brochure.

■ Information Technology (IT) changes accordingly, perhaps even faster. What is vital is that the decisions you make today need to have the capacity to address situations for at least the next three years and the changes that are bound to occur in that time.

■ We at Infiniti Product Development recognise this need as the key to success for you, and for us. Infiniti, backed by direct selling, built-to-order, ISO 9002 manufacturing, ensures that you get the best available product at the time of delivery, rather than the time of order.

■ This *Technology First* brand of IT features the latest innovations in Central Processing Unit (CPU) design, graphics design, display design, I/O advancements and a host of other technologies that make Infiniti the 'best product' brand.

■ Infiniti is the only brand in Indian IT that offers you Remote Support for software*, an innovative support mechanism that is end-user friendly and extremely efficient in problem resolution, saving you time and opportunity.

■ Infiniti. It will ensure that you get the best possible in technology, performance and management. So, make the right decision. Opt for Infiniti.
