	Electrification of left over villages	<p>A power house is operating at Ponda for 5 Hrs. daily on trial. Surrounding villages to a maximum distance of 3 KM will be electrified by laying LT cables. HT lines could be laid if Tribal Council makes 10 Mtrs. wide clear passage between villages by cutting trees / bushes for erecting electric poles and lines. It was suggested to the tribal leaders to explore the possibility of shifting scattered settlement to one place. However, the tribal leaders agreed to the proposal of S.E to adopt solar lantern, costing Rs. 5000/- each at a subsidized cost of Rs. 1000/- each. For repair of old solar lanterns department can arrange free training for tribal boys or local TV mechanic.</p> <p>Action : SE (Electricity)</p>
Upper Katchal	Replacement of Wooden Poles	<p>There are about 15 wooden Poles erected around six months back and these will be replaced in a phased manner by pipe poles. In future wooden poles, if any used, will be with metal caps and coal tar / waste oil treatment to increase the life.</p> <p>Action : SE (Electricity)</p>
	Extension of Electric Lines for Electrification of Kulatapangia / Vyartapu	<p>The Tribal Council has agreed to discuss among themselves and confirm that 10 Mtrs. wide passage by clearing trees / bushes will be made available for erection of HT / LT OH lines and transformers at the earliest.</p> <p>Action : DC, C/N</p>
