

	Permanent posting of Regular Mazdoor	To be looked into by Director (Agriculture)
Campbell bay	There are water logged fields due to continuous rain. They are not able to cultivate fields during the last couple of years in Govindanagar. This point was raised by Shri. Dilip Singh of Govindanagar.	Director Agriculture visited Govindanagar area and visited the fields of Dilip Singh, Ramnath Singh and Smti. Jasbiv Kaur etc. The paddy cultivation areas are situated in a basin surrounded by hilly areas. Although nullahs are there, they are silted as well as full of weeds, However, according to the cultivators, only de-sitting and cleaning of nullahs will not solve the water stagnation problem. They want new land allocation in exchange of there non-cultivable paddy lands. Cleansing & desilting of nullahs which will be taken up in phases by agricultural Department. DC (C/N) to examine the issue of alternate land. Action : DC (C/N) ; Director (Agri)
