

number of Tribal villages, villages connected by road/ footpath and villages not yet connected are placed in the Annexure-B.

Regarding environmental clearance, some cases are pending with Forest department/ Ministry. The matter is being pursued for early clearance.

**Point-03      Constructions of Sluice gate to check entry of saline water**

Normally there is very less requirement of sluice gates in Tribal villages as there is less paddy field affected with saline water. However, the requirement of sluice gates are normally identified by the Agriculture Department and either constructed by them or APWD is requested by them for the work.

**Point-04      Schools – Class rooms – drinking water, toilets, repairs of old building, repairs of old quarters, posting of Science and Maths Teachers, Quality Educations (0% Results) in Secondary and Senior Secondary**

The Department of Education is managing a network of 321 schools, with 2762 sections and 2385 class rooms. Total requirement of class rooms in those 321 schools is 4162, including rooms for accommodating Principal, Vice Principal, sports, craft, staff, store, laboratory etc. It means that the Dept is running short of 1777 rooms to meet the full requirement.

During the 9<sup>th</sup> Five Year Plan, 204 class rooms, 149 quarters, 29 toilet blocks, 12 primary school buildings, 5 science laboratories, 2 science blocks, 1 administrative block and 1 hostel were built. During 10<sup>th</sup> Five Year Plan, the Department is targeting construction of 575 class rooms, 105 toilet blocks, 40 quarters and 3 hostels.
