

2. Directorate of Animal Husbandry and Veterinary
  - a. It is felt that the directorate should provide importance in supplying raw materials, technical other inputs to the tribal beneficiaries so as to make their programmes successful. It appears that there is scope for improvement in monitoring and supervisory services in the tribal areas.
3. Electricity Department
  - a. The department may extend their attention to interior tribal villages like interior area Nancowry group of islands and Great Nicobar, providing electricity at least for few hours, through non-conventional energy sources as is being done in Strait Island/Dugong Creek. It is felt that repair and maintenance of the DG set equipments at the remote tribal areas require attention.
4. Directorate of Fisheries
  - a. Although lot of efforts are being done by the directorate towards creation of capital infrastructural development and providing training to the beneficiaries, the tribals in general have not been adequately motivated to take up fishing as an income generating activity. Therefore, the directorate may organise more and more motivational programmes.
