

It has been reported that good amount of plastic and eatable wastages are being found in the Jarawa tribal Reserve, which is hazardous for the Jarawa tribes. It is due to the wastages thrown by the travelers using the ATR passing through JTR. As such, it has been decided that necessary instruction will be passed to the travelers not to throw any plastic and eatable wastage while crossing through Jarawa tribal reserve.

In line of the above, a pamphlet has been drafted (placed alongside) for its distribution to the travelers in the Jirkatang & Middle Strait for creating awareness. AAJVS may be authorized to print the pamphlets and its distributions to the travelers through JPP, Jirkatang & Middle Strait.
