

from pre-page

vehicles through Tarawa Reserve needs careful scrutiny. The present level of traffic is itself very high and by giving more vehicles, especially the smaller vehicles / taxis, will lead to increase in this traffic and resultant impact on the Tarawas in their home / habitat. It will be better that Dept. of Tourism and STA ply more buses with proper facilities for tourists to go to Bantary and beyond. This will not only reduce pressure on our limited resources such as congestion at vehicle Ferry crossing points, but ~~more~~ help in reducing direct negative impact being caused by a large number of tourist taxis plying on this route. We need more discussions and proper guidelines / restrictions on vehicular traffic through Tarawa Reserve and find better alternatives, such as Tourist Buses and use of Ferries for safe and swift transportation between South and Middle - North Atollans. Submitted for kind perusal and direction, on this critical issue, before we give our comments to STA and Tourism Dept.
