3	What schemes have been and are proposed to tackle "problem village" in the matter of drinking water supply?	By providing Rain water Harvesting structure in Problem villages
4	What schemes have been and are proposed to tackle "non-problem villages" in the matter of drinking water supply ?	Not applicable
5	It has been expressed in some areas that since the tribal people have been used draw their supply from streams and springs, they do not make use of well water because of difference in taste. What is your experience in this regard? If it is the same, in what way the State Govt. proposed to approach the matter?	There is no such problem. Well water is being used by Tribals
6	The State Govt. must be fully aware that the health of the tribals is affected and they suffer from different water borne diseases to a considerable extent because of lack of hygienic water supply. What priority have the State Government attached so far and propose to attach hereafter to drinking water supply?	Water supply is being given top priority
7	In what way is the priority reflected in allocation of funds in State Plan, SCA, Article 275(1) funds and other sources of funds mentioning quantum of funds in each? Please illustrate with reference to funds allotted for this sector during the preceding 9 Plan periods and proposed for the Tenth Plan. Please indicate (a) Allocations as percentages of the total (b) the expenditure incurred and (c) physical achievements made.	<p>First to Seven Five Year Plan - Not Available</p> <p>Eight Five Year Plan - 200 00Lakhs (9.66%)</p> <p>Ninth Five Year Plan -Rs.300.00Lakhs (10%)</p> <p>Eight Five Year Plan - Rs. 132.74Lakhs (12.87%)</p> <p>Ninth Five Year Plan- Rs.402.25Lakhs (9.65%)</p> <p>Eight Five Year Plan -</p> <p>Water Supply augmented in 30 Partially Covered villages</p> <p>Ninth Five Year Plan</p> <p>Water Supply augmented in 28 Partially Covered villages</p>
