8	<p>In some mining and hilly areas, the water supply is contaminated with minerals like haemattite, magnetite (iron ores, other salts and minerals). One example is the South Bastar region where the Bailadila mines are located. In some other examples, water has been found to be contaminated with radio-active materials. Are there such instances in your state? If so,</p> <p>(a) Please identify the areas ITDP/ITDA-wise (b) the names of tribal communities and number of families effected (c) the minerals and salts which pollute water (d) the steps taken by the State Govt. to ensure safe drinking water supply in the effected area for human beings and animals.</p>	<p>As per Chemical Survey conducted by NEERI no such cases found.</p>
