Ref. No.

Date.....

A thorough study of the survey will reveal that the newly proposed route is economically viable resulting with all round development their costal/rural areas, which are the grip of utter economic backwardness.

In view of the above mentioned facts it is my earnest request to your Excellency that necessary steps may kindly be taken to construct roads in view of the Supreme court order and in view of the positive signals emerging out of the survey.

If this proposal of the above said construction is mooted it will rescue the Jarawas from the possible threat of their extinction.

The construction of road as an alternative to the present ATR is particularly relevant and inevitable, since the united nations General Assembly has passed resolution to protect the lives of Jarawas and other aboriginals of all over the world.

In anticipation of early action in this regard, I remain.

Thanking you

Yours faithfully
