

2/68 - 58.1 W.W.

It is also all the more difficult to find a place where the
water is pure enough to drink. The water is often
polluted by sewage and industrial waste. This
pollution can cause many health problems.
In addition, there is a lack of clean drinking water
in many parts of the world. This is due to
political instability, poverty, and lack of
access to basic infrastructure like roads and
power lines. In some cases, there is simply no
water source available. In other cases, the
water source is contaminated by
industrial waste or sewage. This
contamination can cause many health problems,
including cholera, typhoid fever, and dysentery.
In some countries, there is a lack of
basic infrastructure like roads and power lines.
This makes it difficult to transport
clean water from one place to another.
In addition, there is a lack of
basic infrastructure like roads and power lines.
This makes it difficult to transport
clean water from one place to another.

May kindly peruse the notes at paras 156-157/a above. As per the discussions at a meeting held today at 11.00 a.m. in the chamber of Secretary (TW), A & N Administration, the departments involved in the welfare and the development of the Jarswas have agreed to meet the committed liability towards recruiting expenditure for establishment of a hospital at Bamboo Tekn and staging posts at the following places viz. Tulu, Potatang, Middle Strait and Lakra Lumgta. Accordingly we may inform the GOI, if approved. A draft minutes of the meeting today and a draft reply are placed opposite for perusal for approval please.
