

- In Tirur area it was noted that though traditionally Ang (Jarawa) are self-sufficient community, they moved from one place to another place for their subsistence. In the present scenario, Ang (Jarawa) acquiring some attitude from the *Eenen*. They are visiting the settlement area for developing the interaction with the settler and by that time they collect rice, sugar, edible oil, biscuits, murku, cloth, with more hearty relation with the *Eenen*. They want to move in the settlement area without any obstruction from the *Eenen* and freedom to collect those things which are used by the *Eenen* as like coconut, banana and all other edible item. At this moment they are trying to improve their attitude which should be match with the *Eenen*.
- Prevalence of tobacco use among males is prominent than females, even when a father using sukkha or pans at the same time his children forwarding hands towards father and father also contentedly sharing with the children.
- Poaching activities:  
Poaching activities both forest and sea shore are prevailing in different pockets of Tirur, Middle Strait and Baratang area .  
  
Foreign patching is declining while local patching presently developing toward the barter system. Simultaneously we can't deny the local patching in that Area.
- Due to increased contact with non-Ang, Ang (Jarawa) are prone to different contaminated and transmitted diseases like- fungal infection and STD.
- They developed good relationship with some specific selected *Eenen*. For their bartering need. Rajakhari of Tirur is one of the suitable place for their bartering. The all activities are done by pre-verbal agreement. They put some of their collected items at a specific place to be collected item by the pre-selected *Eenen*. Thereafter, for a moment Jarawa and *Eenen* both are congregate at the settlement area and during that time they fix for the next item of bartering.

#### Impact on Settlers:

- The villagers have no idea about notion of core zone and buffer zone. A fear is created among the people regarding core zone and buffer zone impact and political parties are taking advantage from this issue.
