

As to the question whether Jarwas should

cross-infection of general patients to avoid any possibility of
be kept in exclusive place apart from the wards
Primary Health Centres as patients they should
system and Jarwas were taken to hospital or
they have responded positively to medical care
routine health check-up for the Jarwas where
system of medication, therefore, it suggested
and at the same time conserving their own
the Jarwas from diseases beyond their control
handle the dual responsibilities of protecting
informed and properly sensitized personnel can
should be judged on a reasonable only well-
The Committee opined that the medical intervention
create additional health hazards for the Jarwas
to treat even their minor ailments which would
eventually but also the Jarwas would not be able
of the human wisdom would be lost in such an
of medicine and in some event not only a portion
although they had have their own indigenous system
in such event become dependant on xxx same,
of ailments as, according to the Committee, Jarwas
such medical aids indiscriminately for all kinds
same was being asked for, opined against giving
medical aids were given to the Jarwas and the
The Committee was recording the fact that
difficulties for the Jarwas
official and non-official persons may create
