

While Secretary(A&C) assured that copra procurement would be resumed he stated that it may actually get into effect only by the end of this month as they need some time to arrange the finances for this purpose. Instructions are also being issued for the immediate release of pending payments.

In addition, Secretary(A&C) pointed out that as NAFED needs time to dispose of the crops procured by them, in future it may not be possible for them to procure

copra round the year. They favoured a system whereby copra may be procured only for 3 months in a year. And they wanted us to specify the 3 months most suitable to us. In this regard I stated that as copra was a perennial crop being harvested round the year, its procurement for only 3 months

wanted us to specify the 3 months most suitable to us. In this regard I stated that if the bad during the remaining parts of the year. Therefore I sought special consideration for our territory and becoming again would result in the financial condition of tribal farmers in a year would result in accumulation of large stocks and should be for atleast 6 months in a year for our UT. As state suggested that if at all procurement is to be time-restricted it

government officers were asked to give their views in this regard on a format, I recorded these views in the format which I submitted.

Secretary(A&C) further suggested that for the remaining part of the year when copra could not be procured by the NAFED, the UT Admin. may consider supporting the remaining part of the year under other schemes such as those for tribal farmers under the UT Plan budget.

Secretary(A&C) further suggested that for the remaining part of the year when copra could not be procured by the NAFED, the UT Admin. may consider supporting the remaining part of the year under other schemes such as those for tribal farmers under the UT Plan budget.
