

64	Recognition of Scheduled castes	MP-A&NI	A & N Islands were inhabited only by aboriginal tribes prior to the founding of penal settlement. The settlement grew over the decades even after independence and the society that developed in this Union Territory is a unique by itself wherein caste and creed have not been the deciding factor for the Administration. In these islands, so far no scheduled caste community has been declared and the practice of untouchability is non-existent or none of the communities suffer any caste discrimination or they are barred from the use of public places. In view of above, the issue of inclusion of any migrant community in to SC/ST Category is a policy matter with long term consequences on the interest of the native tribes and the present casteless society.
