have to use this mode of communication also. approaching northern group of islands would necessarily permitted to move on the ATR. Moreover, tourists which would cause undue hardship if they were not existing policy does not ban the use of private vehicles, tourists and others. It may also be pointed out that the extent to which the fares are attractive enough for services for tourists are concerned, it would depend upon As regards the use of luxury cruise boats and helicopter mishaps.

lasts from May to October. Otherwise there could be become imminent during the monsoon period, which such a mode of transport will either be suspended or transportation by boat and it may be pointed out that necessarily have to be given for use of such that of the land route. Moreover, subsidies would the cost of the sea route will always be on higher side studies can certainly be undertaken, it is apparent that in so far as recommendations 2-5 are concerned, while

Administration has appealed against the closure of ATR. review with the Hon'ble Supreme Court, since AN Authority. Moreover this matter is sub-judice and under examined by the National Disaster Management Commission in this area. This view can be further the backup rather than the preferred system of at alternative arrangements only with a view to providing purposes. Hence this Administration would need to look
