

Central Assistance during the Ninth Five Year Plan for various sectors and for the development of Primitive Tribes.

The achievement during the Eighth Five Year Plan is 75.3% in financial terms. The shortfall in the achievement is mainly because of delay in the procurement of ships under sector "Shipping". Further, because of environmental restrictions, the building materials like sand, stones, etc, could not be made available and as a result, the capital works also had a set-back. However, during the Ninth Five Year Plan, the concerted and continuous efforts shall be made to monitor the implementation of schemes in each sector. The sector-wise allocation of funds during the Ninth Five Year Plan is given in the Annexure.
