

(93)

The Nicobaren Guest house under construction at South Point was inspected by the Director (TW) & Executive Engineer jointly on 26-8-93. After the inspection, the possibility of carving out a kitchen in the ground floor of the Guest house without major alteration was discussed and agreed. The <sup>option</sup> ~~caution~~ for providing separate block for kitchen attached to the Guest House was also discussed, but not recommended as it would involve additional expenditure. Accordingly, we may request the APWD to take necessary action and also request them to submit an estimate for furnishing the guest house.

A fair letter is placed opposite for approval & signature please.
