

- Health department have regularly provided doctor/ nurse/ ANM for health awareness programme in Children's development centre.
- Butterflies is now well recognized by the Tribal Council for its sincere and committed work even in the absence of sufficient visibility.

WITH CHILDREN :

- Butterflies initiated the process of empowerment among children through CDC activities.
- Children take up social issues specific to their locality with the concerned authority.
- Health education taught in CDC has developed positive hygienic behaviour among children.
- Through ANCT children express their views, ideas, problems, develop their writing and editing skills.
- Library helped the children to learn many new thoughts and ideas, new subjects, life histories of famous personalities and their achievements.
- The radio programme 'Choti si Asha' was liked by the children very much as the information were conveyed in interesting way through small stories, poems, songs and jokes in Nicobari language which helped them to understand better.
- Regular sports & entertainment activities offers children fun, relaxation, refreshment from their studies and physical exercises that is essential for their healthy growth.
- Life skill education enabled the children to advocate for rights, identify discrimination and injustice in society, developed skills to think, reflect and comprehend.
